

Chair's Report

6/14/25 Assembly

The Familial Ties of Alcoholism

Alcoholism is a family disease. The disease affects all those who have a relationship with a problem drinker.

Data from 15,037 responses suggest that most Al-Anon members are affected by alcoholism spanning multiple generations.

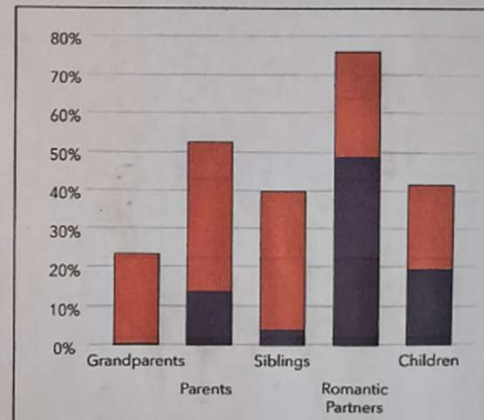

49% of members surveyed came to Al-Anon because of a romantic partner's alcoholism/ addiction, **14%** due to a parent's, and **20%** due to a child's.

Person	% Led to Al-Anon	% Negatively affected
Grandparents	0.5%	23.6%
Parents	14.3%	52.9%
Siblings	3.8%	40.0%
Romantic Partners	49.0%	75.9%
Children	19.6%	41.8%

Responding members identified the following relationships with people whose alcoholism/addiction led them to Al-Anon:

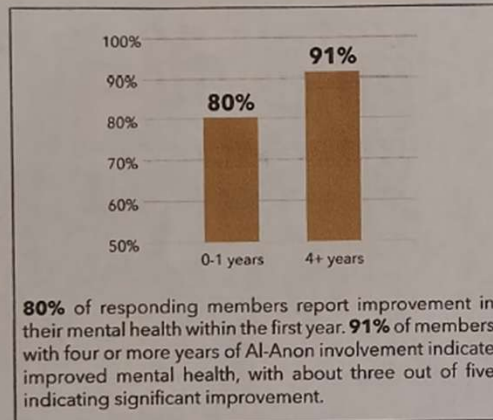

On average, **69 out of 100 respondents** reported being affected by alcoholism spanning two or more generations. Results by demographics (i.e. age, gender, language, income, sexual orientation, or race) remained consistently between 60 to 70 out of 100.

The Effectiveness of Al-Anon

Participation in Al-Anon meetings can have profound effects on a person's mental health and improve their quality of life. Asked to rank their mental health on scale of one to seven, 15,561 members surveyed rated an average of 3.14 prior to attending Al-Anon meetings and 5.8 on the day they took the survey.

Al-Anon Welcomes Newcomers

Visiting a variety of different meetings to gather information or to hear how others handle issues with alcoholism may be helpful to understand how the Al-Anon principles work in many different circumstances.

Currently, there are over 21,000 Al-Anon groups and nearly 1,200 Alateen groups meeting in 118 countries.

Survey results indicated that **96%** of respondents have attended face-to-face/in-person meetings, **60%** online meetings, **22%** phone meetings, and **18%** participated in meetings on the *Al-Anon Family Groups Mobile App*.

Survey results indicated that 45% of respondents first came to Al-Anon because of a drug problem in a relative or friend.

Individuals concerned about someone's drug addiction are welcome to attend Al-Anon to determine if it's right for them, with the understanding that our program focuses on alcoholism.

31% of members also consider or have considered themselves a member of other recovery programs, including A.A.

Al-Anon respondents also seek help from other resources when needed for concerns in addition to or other than someone else's drinking.
